

SCID Certification

Systematic Curriculum and Instructional Development

March 26th – 30th, 2012

SCID is presented in a comprehensive 5-day workshop that enables the practitioner to learn and implement critical tasks essential for developing competency-based learner-centered curriculum and instructional materials.

Registration Information (SPACE IS LIMITED)

Cost: \$950 for faculty/staff at Washington Community and Technical Colleges

Dates: March 26th through March 30th, 2012

Location: Green River Community College - Kent Station, Kent WA

Registration is available online at www.Careersined.org

About the Workshop

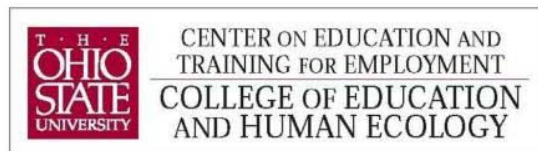

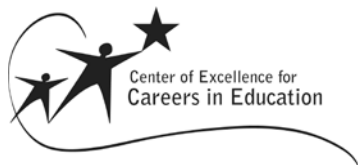

SCID is complementary to the DACUM workshop. It basically answers the question, "How can you teach most effectively what needs to be taught?" SCID is a systematic process model used to develop curriculum and instructional materials needed to train tomorrow's workforce.

During the 5-day workshop, participants will engage in group presentations, small group discussions, and individual hands-on practical exercises and activities. A variety of instructional methods are utilized to provide hands-on opportunities in the knowledge, skills, and behaviors of the SCID process of instructional design.

Participants will receive a copy of the 400+ page SCID Handbook; copy of the accompanying PowerPoint Presentation; computer templates for task verification, task analysis, learning guides, learning aids; and other handout materials.

Participants will acquire knowledge, skills, and behaviors through small group hands-on experiences. These will enable them to develop competency-based instructional materials such as Competency Profiles, Learning Guides, Learning Aids, Job Aids, Modules, Curriculum Guides, and Lesson Plans. One-on-one mentoring is provided throughout the workshop.
